The healthcare industry is a complex and vital sector that provides medical services, equipment, and facilities to patients in need. One of the key challenges faced by healthcare companies and hospitals is the coordination and scheduling of tasks and appointments with medical device companies across territories.

Conventional healthcare systems are quite complex and monotonous. Their scheduling processes through legacy systems are mostly cumbersome and tiresome for its employees and doctors as they don't have a clear schedule or forecast in place. Clinics and hospitals often rely on these traditional systems or manual methods to manage the

schedules of doctors, patients, and medical device companies' sales reps. This can result

in last-minute scheduling mismatches, resource burn down, dissatisfaction, revenue loss,

and further losses to med device manufacturing companies as their sales team missed

many of their appointments.

# Challenges

Modern day clinics face uphill tasks of coordinating & scheduling tasks with multiple medical device companies they deal with and manage their team's daily schedules at a time.

Tracking the daily tasks, schedules, appointments, managing the workload of employees across departments and collaborating with internal teams

manually which results in lastminute scheduling mismatch, resource burn down, dissatisfaction and revenue loss. Clinics cannot afford to miss a critical appointment due to the unavailability of device or medical rep availability or poor scheduling.

The below challenges in the current system helped the client to build a robust and scalable scheduling platform:

- Poor coordination with medical device companies.
- Inefficient manual scheduling methods.
- Lack of proper tools and support.
- Poor customer satisfaction.
- Stunted business growth.
- Risk of legal consequences.

## Solutions

To address the challenges faced by healthcare companies and hospitals in scheduling and coordination, Fortunesoft took up the project to develop a CRM system. The development team at Fortunesoft was young and dynamic, with a passion for innovation and problem-solving. They used the AGILE methodology to ensure that the development process was flexible and responsive to changing requirements.

Fortunesoft has done deep-dive research on the various challenges faced by our client

and conducted various online campaigns and multiple product discovery workshops to a great extent for preparing the roadmap & clear product vision. The product discovery workshop helps the cross-functional team to focus on the primary vision of the product and solution to overcome the challenges effectively.

After careful analysis of the requirements and challenges, Fortunesoft delivered a highly advanced and robust healthcare scheduling management SaaS platform which helped the clinics/hospitals to schedule, manage tasks automatically and seamlessly. This was ClinicalC2, a multi-tenant SaaS vendor scheduling platform for healthcare management.

ClinicalC2 Dashboard Tasks Companies Departments Users Report

ClinicalC2 uses advanced smart algorithms to handle critical tasks and information associated with an organization. It facilitates smooth interaction between clinics/ hospitals and medical device companies which in turn results in effective team management and service deliverability.

ClinicalC2 streamlines workflow and

communication, allowing hospitals to coordinate

effectively with doctors and sales reps. The

platform also includes features such as automated

scheduling, vendor handling, advanced analytics,

and vendor onboarding. The simple and easy to

use solution delivers scheduling services with high clinical value, usability and interactive experience

to end users.

ClinicalC2 offers comprehensive task

management and scheduling provision to clinics.

It includes:

Account Management

#### •

- Task Management & Scheduling
- Account Analytics
- Resource Collaboration
- B2B Task Requests.

## Results

As a result of implementing the automated scheduling and vendor handling platform it made a huge difference in the unorganized healthcare sector through effective scheduling. The SaaS multi-tenanted healthcare scheduling system helped hospitals or clinics to streamline & simplify their scheduling and monitoring process effectively. **Key benefits:** 

User friendly and reduce no-shows drastically through continuous monitoring

- Reduce appointment gaps through automated scheduling which results in
- enhanced efficiency
- Improvised collaboration and proper workload management
- Track all your appointments at one place with timely reminders
- Critical resource utilization to a greater extent

"Fortunesoft IT Innovations has been an outstanding business partner for our company. After a terrible experience using offshore developers, we took a chance on Fortunesoft IT Innovations and they have been excellent to work with. The team is relentless in following agile development processes. They took the time to learn our business and it shows in the quality of the work they do. Their team has a broad range of skillsets and were able to help us with every aspect of our start-up company."
